

Boarding Ladder for Under Toad

Under Toad is now equipped with a boarding ladder to facilitate re-boarding in the event of a Man Over Board (MOB) event. Here is how it to be used and deployed:

The ladder and instruction booklet are stored in the cooler in a plastic see-through zip lock bag on Under Toad.

Remove the ladder from the bag and install it on the port side of the transom by clipping the two snap hooks, one each to the backstay pad eyes. Note that the attachment lines are of different lengths; attached the short line to the port pad eye and the longer line to the starboard pad eye.

Ladder (orange image) in place on port side of transom

Snap hooks attached - one to each backstay pad eye

Short line with snap hook attached to port backstay pad eye

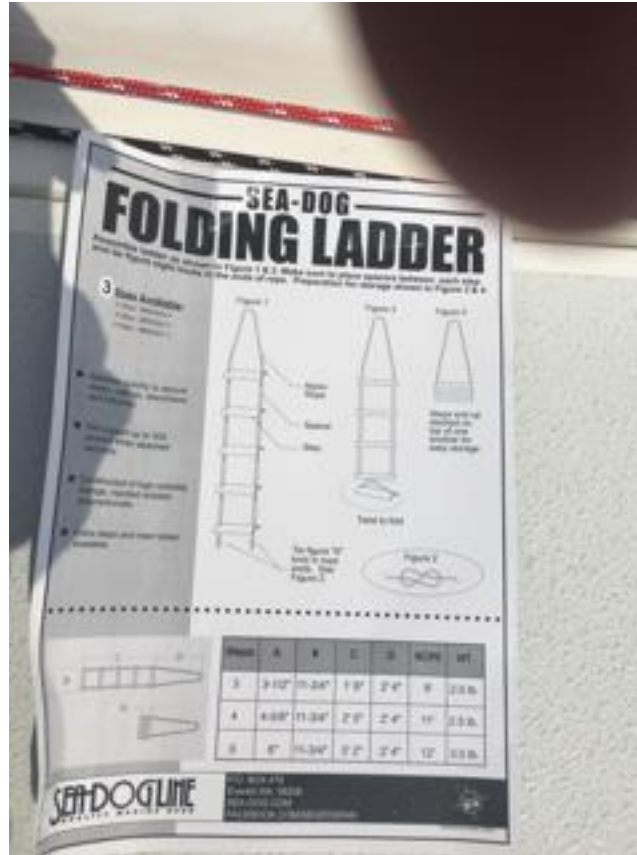

Long line snap shackle attached to starboard backstay pad eye

As the person comes up the ladder, offer assistance in getting him/her from the ladder onto the boat.

After the MOB is securely on the boat remove the boarding ladder from the transom. When all is settled and secure, fold the ladder per the instruction in the bag and return to the cooler. Note the special way to fold the ladder so that it fits back compactly in the plastic bag.
